

Driving Review Roadmap

01

Cognitive Evaluation

Sit down with the individual in their home and learn about their day-to-day tasks. Through conversation and activities, get an understanding of cognitive abilities.

02

Road Skills in Their Car

If deemed safe, accompany the individual in their car through familiar routes they rely on. Determine driver safety knowledge, physical abilities, problem solving and reaction times.

03

Determination

Express our findings to the individual and their family through conversation and a written report. Make recommendations for accommodations, a follow up review or suggest retiring the keys.

04

Future Planning

If driving will be limited or concluding, create a plan of action to allow the individual to continue to live as independently as possible.
